PROFILE

Artificial Intelligence undergraduate at SLIIT with strong passion for intelligent systems, machine learning, and software development. Hands-on experience designing and deploying end-to-end AI systems including web applications, and predictive models. Skilled in data preprocessing, feature engineering, model evaluation and performance optimization. Known for rapidly translating theoretical concepts into practical implementations, eager to contribute to innovative, real-world AI initiatives and deliver impactful data-driven results.

EDUCATION

BSc (Hons) in Information Technology Specializing in Artificial Intelligence *(Reading)*

Sri Lanka Institute of Information Technology (SLIIT)

2024 – Present

Diploma in Information Technology

Wayamba University, Sri Lanka

July 2023 – February 2025

Diploma in English Language

South Eastern University, Sri Lanka

April 2023 – January 2025

PROJECTS

Telecom Customer Churn Prediction - *Machine Learning & Customer Retention System*

- Built an end-to-end telecom churn prediction pipeline covering data cleaning, EDA, preprocessing, model comparison, threshold optimization, explainability, testing, and API deployment.
- Benchmarked models against business-rule baselines and used paired bootstrap analysis to assess uncertainty in Logistic Regression and Random Forest comparisons.
- Technologies: Python, pandas, NumPy, scikit-learn, FastAPI, Pydantic, joblib, pytest
- GitHub: https://github.com/IT24100052/Telecom-churn-prediction

AI-Powered FinOps Platform – *Cloud Cost Intelligence & Optimization*

- Built a full-stack cloud cost management platform featuring interactive dashboards, cloud billing analytics, budget tracking, and secure JWT-based authentication.
- Implemented cost forecasting, cloud waste detection, resource utilization analysis, and actionable cost optimization insights to support data-driven cloud spending decisions.
- Implemented secure data isolation and billing upload validation.
- Technologies: Python, FastAPI, React.js, Vite, PostgreSQL, SQLAlchemy, REST APIs, JWT, Pandas, Scikit-learn
- GitHub: https://github.com/IT24100052/finops-ai

LifeLink – *Intelligent Blood Bank & Hospital Management System (Academic Project)*

- Engineered an end-to-end healthcare coordination platform streamlining blood donation requests, donor screening, hospital inventory tracking, cross-facility transfers, and emergency response workflows.
- Architected a robust ASP.NET Core system of record paired with a Python/FastAPI multi-agent subsystem using LangGraph and Google Gemini for automated donor eligibility triage, inventory analytics, and alert routing.
- Technologies: ASP.NET Core 8, EF Core, PostgreSQL, React, Flutter, Python, FastAPI, LangGraph, Google Gemini
- GitHub: https://github.com/Thavarubanp/LIfelink.git

Hospital Readmission Prediction – *Machine Learning & Healthcare Risk Analysis*

- Built a readmission prediction pipeline covering data cleaning, EDA, feature engineering, model comparison, and evaluation.
- Compared Logistic Regression, Decision Tree, Random Forest, and XGBoost using patient-separated cross-validation.
- Technologies: Python, pandas, NumPy, scikit-learn, XGBoost, Matplotlib, Seaborn, joblib
- GitHub: https://github.com/IT24100052/Hospital-readmission-prediction

EastTop POS System – *Retail & Inventory Management Application*

- Built a complete POS and inventory management system with invoicing, stock handling, customer/supplier, management and reporting features.
- Developed REST APIs and an interactive SPA frontend with authentication and dashboard analytics.
- Technologies: Node.js, Express.js, MongoDB, JavaScript, HTML/CSS
- GitHub: https://github.com/IT24100052/EastTop-POS.git

SKILLS

Programming Languages: C/C++, Java, JavaScript, Python, PHP

Web & APIs: HTML, CSS, React.js, Node.js, Express.js, REST APIs, JSP, Servlets, FastAPI, Pydantic

Machine Learning: Regression, Decision Tree, Random Forest, Clustering, Deep Learning, Neural Networks, Model Training, Data Preprocessing, Feature Engineering, Classification

Software Engineering: Design Patterns, SOLID Principle, Agile/Scrum, System Design Fundamentals

Databases: MySQL, MongoDB, PostgreSQL, Oracle

Data & Libraries: NumPy, Pandas, Matplotlib, Seaborn, scikit-learn, XGBoost

Cloud & Deployment: AWS, Azure, Google Colab, Render, Vercel, Streamlit

Developer Tools: Git/Github, VS Code, IntelliJ IDEA, Jupyter Notebook, Apache Tomcat, Linux

EXTRACURRICULAR ACTIVITIES

Club/Societies: SLIIT Rotaract Club *(Member)*, AIESEC In SLIIT *(Member)*, SLIIT Gavel Club *(Member)* (2024-Present)

Sports: Football, Cricket, Athletic

LICENSES & CERTIFICATIONS

Python For Beginners - Moratuwa University of Sri Lanka *(2025)*

Microsoft Certified: Azure AI Fundamentals - Microsoft *(Reading)*
